NOUVEAU CLARIS XXL

Système de filtration de l'eau pour machines à café, distributeurs automatiques, et équipements pour la restauration

Le nouveau système de filtration CLARIS a été conçu dans les moindres détails pour répondre de manière précise aux exigences de qualité et de service du marché du foodservice. Ce système unique réunit une technologie de filtration sophistiquée et une conception intelligente d'un procédé de filtration à 5 étapes offrant ainsi l'excellence pour l'industrie de la distribution automatique et de la restauration. Grâce à la technologie du bypass DUOBLEND®, le filtre CLARIS permet une adaptation précise et constante du niveau de la dureté carbonatée pour répondre aux exigences technologiques de la machine, permettant ainsi d'utiliser au mieux la capacité du filtre.

SYSTEME XXL

Systèmes de filtration CLARIS
tailles: S, M, L, XL, XXL

Importance de la technologie, Claris vous offre le meilleur

- Filtration à 5 étapes avec un filtre bloc de charbon actif 5 µm
- Utilisation en position verticale ou horizontale
- Toute l'eau passant dans le système est filtrée
- Technologie du bypass DUOBLEND® pour un ajustement précis de la dureté carbonatée

Un concept de filtration flexible pour un marché en évolution

- Caractéristiques uniques pour le meilleur rapport qualité/prix
- Cartouche remplaçable en quelques secondes (visse 1/4 de tour)
- Vanne d'arrêt entrée/sortie et de dépressurisation automatique
- Tête multifonctions adaptable à toutes les tailles
- Event et rinçage directement sur la tête, pas besoin de déconnecter les tuyaux

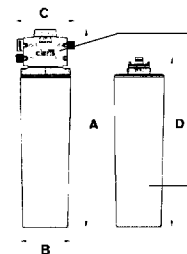

Protection pour votre machine-perfection pour vos clients

- Diminue les coûts de maintenance dus au calcaire
- Un café savoureux avec tout son arôme et onctuosité
- Évite les temps d'arrêt et les clients mécontents
